## Furniture/Interior/Door Subsidiary materials Hardware

Unparalleled quality!

Reasonable price!

Tight production management!

We will do our best with the aim of  
being the best in the industry.

We put “Technology” to create future value and  
“Sincerity” to think of customers in our products.

In the midst of the digital economic era of the 21st century that  
transcends national borders, we are committed to  
developing and producing practical and high-quality hardware to  
become a new engine in the hardware market.

We have also developed die casting process, automated production system,  
and quality certification standards based on domestic raw materials  
and manpower for easy and instant production, distribution,  
and development to meet market demands.

Based on technology and know-how accumulated for a long time,  
we will continue to make high-quality products  
that can meet customer needs.

We promise to make continuous efforts until our products  
become standards at home and abroad.

All Employees of Cheong-Gu Metal

# Cheong Gu- Total Hardware Diecasting

As a human-oriented company,  
we will contribute to the introduction  
and development of advanced technology,  
and furthermore, we will leave our footsteps  
as a global company in the world.

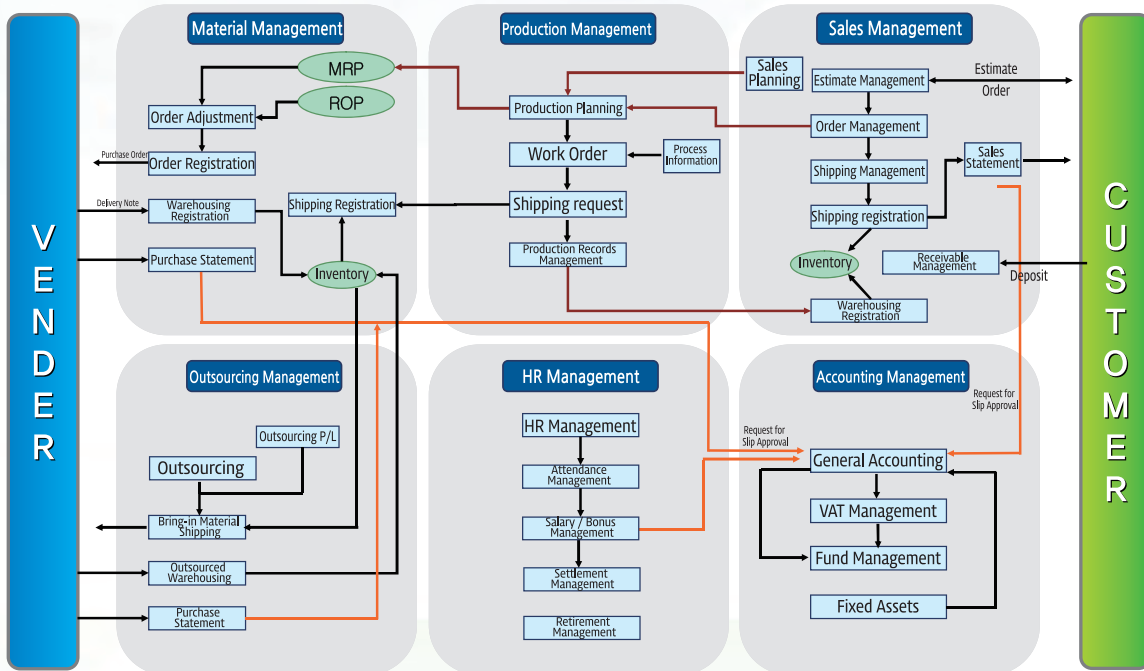

## Company History

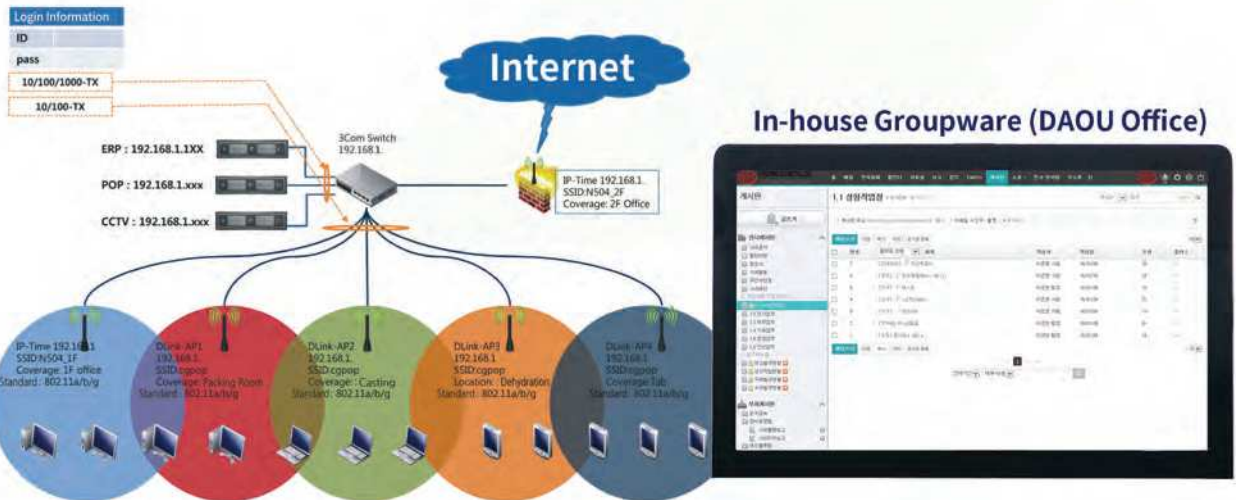

1992.06.26	Cheong-Gu Metal Incorporated
2000.03.10	Moved Moved and expanded the factory to Seong-seo 3rd Complex
2001.05.29	Registered through-hole assembly nut patent - the first in die casting
2001.08.23	Participated in the 6th MBC Construction Fair - SETEC
2001.12.10	Participated in the Woodworking Korea 2001 - COEX
2002.08.12	 Trademark Registered
2002.10.16	Participated in the Seoul International Furniture & Woodworking Machinery Exhibition 2002 - COEX
2004.03.20	Expanded Automation Equipment - Processing Part
2004.11.18	Acquired QS-9000 Quality Certification
2004.12.30	Acquired ISO9001:2000 Quality Certification
2005.11.01	Registered Patent for Dowel for Both Wood and Glass - PLUS DOWEL
2007.08.23	Participated in the Korea International Furniture & Interior Industry Fair 2007 - KINTEX
2008.02.22	Participated in the Kyunghyang Housing Fair 2008 - KINTEX
2008.07.01	Built the ERP System
2009.06.01	Built the POP System
2011.02.26	Expanded Site Building and Automated Line
2011.09.06	Built Die Casting Machine Automation Facility
2015.01.28	Introduced DAOU Office as In-house Groupware
2015.02.09	Registered one-Touch Door Stopper as a utility Model
2015.06.04	Registered one-Touch Door Stopper (non-slip) Design
2016.12.07	Certified as an Excellent Technology Company (for 2 consecutive years) - from NICE Information Service
2016.12.23	Company-Affiliated Research Institute Approved
2017.08.30	Participated in the KOFURN EXHIBITION 2017 - KINTEX
2020.03.01	Export to Amazon (USA)
2020.06.24	Patent Registration of Dustproof Door Stopper System
2020.09.11	US Trademark Registration 
2020.11.05	Pet Door Stopper Patent Registration

We prepare for and lead change and technology development for the future.

Satin Nickel Gold Brown Dark-gray Black

**<Reinforcement Plate to be Sold Separately>**  
Used for fire doors and wooden doors made of thin plates (for maintenance)

**One-Touch Door Stopper Reinforcement Plate**

Color	Satin Nickel
Material	Fe
Inner Packing	20
Box Packing	100

**UP GRADE**

**Pedal Rubber**

Plate Rubber (Design Registration)

When the one-touch door Stopper is released, shock is absorbed to prevent wear of the direct connecting piece due to vibration, thereby preventing malfunction.

**Blister Packing (Separate order)**

- ▶ Easy release of door support with one touch operation.
- ▶ Excellent anti-slip due to 3D curved structure.
- ▶ Height adjustable (up to 8mm) without the use of tools in case of rubber wear due to a long-term use

Utility Model Registration  
Design Registration  
Non-slip 3D curved structure

This product is a door stopper that is mainly used for fire doors. Compared to the automatic door closing function of door checks, the door stopper adheres to the floor and supports the fire door, serving to keep the fire door open.

In particular, this product features a rubber structure that adheres to the floor to prevent the phenomenon of being pushed back, and has a body made of "X" beads and braces, so the damage rate is low even under strong force. It can also be installed on high-end fire doors due to its beautifully designed exterior.

Secondary Locking Device

Box Packing	100

How to Install the Magnetic Door Stopper

- Fix the stopper body to the door.
- Attach the back screw 4\*32 horizontally to the fixed body to be level with the stopper, and mark the position on the wall. *(This makes it easy for anyone to set the position.)*
- Drill a hole in the part marked on the wall.
- (Example)* Remove the socket plate by referring to *How to Remove the Socket Body*, and fit the screw anchor into the wall and secure it with the back screw 4\*32.
- Insert the socket cap and spring into the removed socket body, and reassemble to check the stopper body and its position by opening and closing the door.
- Open and close the door to check if the magnetic force is working properly.

**Example**

How to Remove the Socket Body

Push the upper and lower parts of the socket body with your thumb and turn and remove the body.

Knob body for 4-sided frame door with a bracket part bent. For the doors with a narrow frame, the bracket of the joint is manufactured in a bent type to prevent accidents such as hand injuries and to secure space when the knob body is held. Recently thumb knobs for safe door are used a lot as they are safe and practical to use.
