Unparalleled quality!

Reasonable price!

Tight production management!

We will do our best with the aim of
being the best in the industry.

We put "Technology" to create future value and
"Sincerity" to think of customers in our products.

In the midst of the digital economic era of the 21st century that
transcends national borders, we are committed to
developing and producing practical and high-quality hardware to
become a new engine in the hardware market.

We have also developed die casting process, automated production system,
and quality certification standards based on domestic raw materials
and manpower for easy and instant production, distribution,
and development to meet market demands.

Based on technology and know-how accumulated for a long time,
we will continue to make high-quality products
that can meet customer needs.

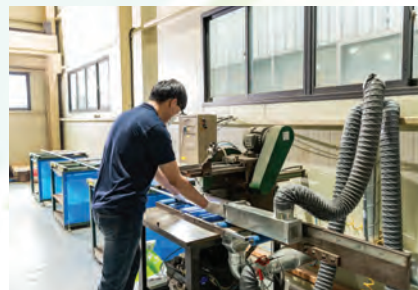

We promise to make continuous efforts until our products
become standards at home and abroad.

All Employees of Cheong-Gu Metal

Cheong Gu- Total Hardware Diecasting

As a human-oriented company,
we will contribute to the introduction
and development of advanced technology,
and furthermore, we will leave our footsteps
as a global company in the world.

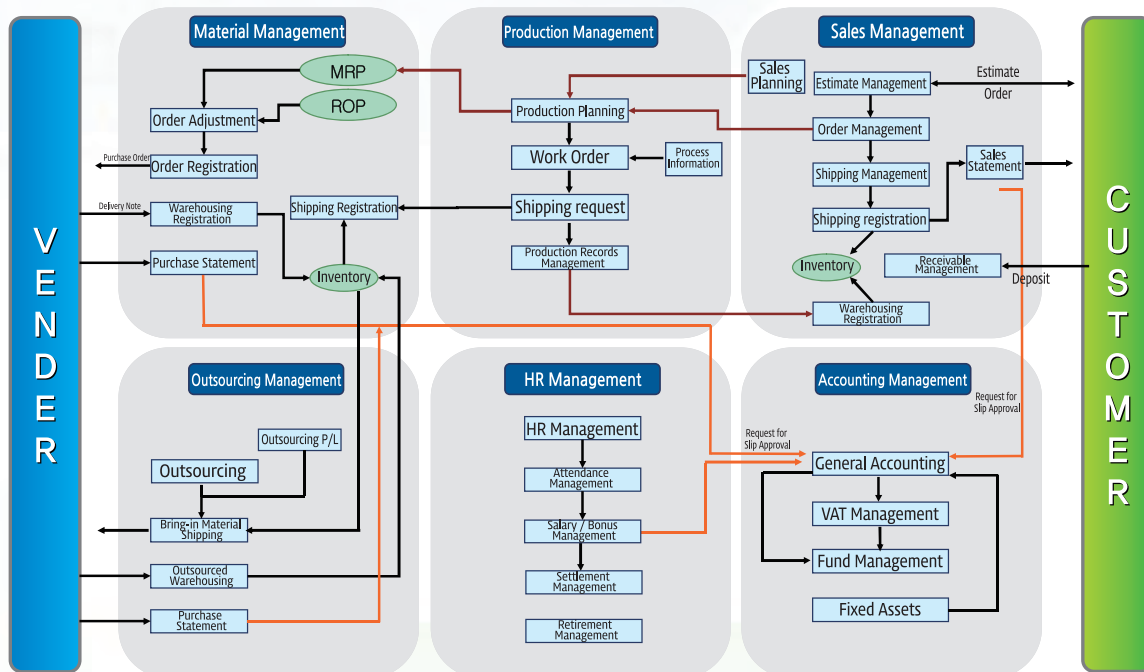

Company History

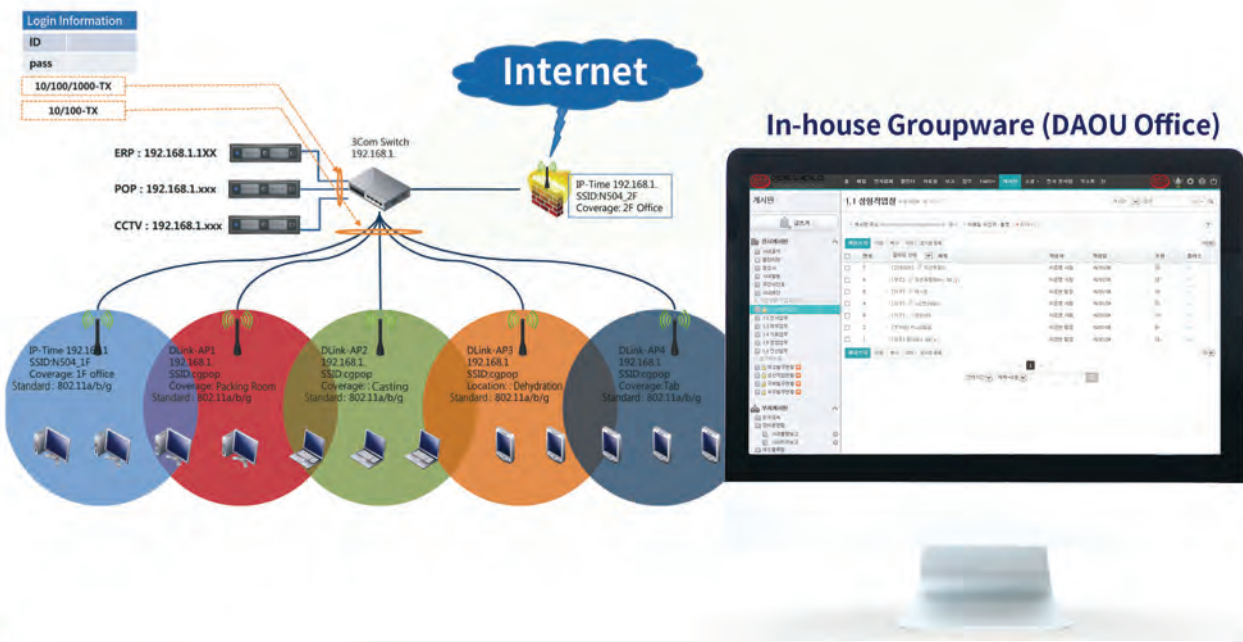

1992.06.26	Cheong-Gu Metal Incorporated
2000.03.10	Moved and expanded the factory to Seong-seo 3rd Complex
2002.08.12	 Trademark Registered
2004.03.20	Expanded Automation Equipment - Processing Part
2004.11.18	Acquired QS-9000 Quality Certification
2004.12.30	Acquired ISO9001:2000 Quality Certification
2008.07.01	Built the ERP System
2009.06.01	Built the POP System
2011.02.26	Expanded Site Building and Automated Line
2011.09.06	Built Die Casting Machine Automation Facility
2015.01.28	Introduced DAOU Office as In-house Groupware
2020.03.01	Export to Amazon (USA)
2020.09.11	US Trademark Registration 
2021.08.27	Recognized as R&D departments
2022.03.31	Safety Investment Innovation Project
2022.12.08	Certified as an excellent technology company (for 8 consecutive years) - from NICE Information Service
2022.12.31	Smart factory construction and advancement business
2022.12.31	Intelligent root processing system construction project

We prepare for and lead change and technology development for the future.

GRADE**

Pedal Rubber

Plate Rubber (Design Registration)

When the one-touch door stopper is released, shock is absorbed to prevent wear of the direct connecting piece due to vibration, thereby preventing malfunction.

This product is a door stopper that is mainly used for fire doors. Compared to the automatic door closing function of door checks, the door stopper adheres to the floor and supports the fire door, serving to keep the fire door open.

In particular, this product features a rubber structure that adheres to the floor to prevent the phenomenon of being pushed back, and has a body made of "X" beads and braces, so the damage rate is low even under strong force. It can also be installed on high-end fire doors due to its beautifully designed exterior.

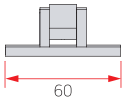

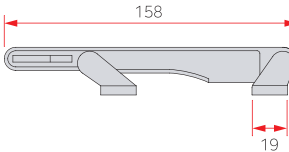

Utility Model Registration
Non-slip 3D curved structure

Design Registration
trenching by adding "X" brace

How to Install the Magnetic Door Stopper

- ① Fix the stopper body to the door.
- ② Attach the back screw 4*32 horizontally to the fixed body to be level with the stopper, and mark the position on the wall.
(This makes it easy for anyone to set the position.)
- ③ Drill a hole in the part marked on the wall.
- ④ (Example) Remove the socket plate by referring to [How to Remove the Socket Body](#), and fit the screw anchor into the wall and secure it with the back screw 4*32.
- ⑤ Insert the socket cap and spring into the removed socket body, and reassemble to check the stopper body and its position by opening and closing the door.
- ⑥ Open and close the door to check if the magnetic force is working properly.

Example

How to Remove the Socket Body

Push the upper and lower parts of the socket body with your thumb and turn and remove the body.

Knob body for 4-sided frame door with a bracket part bent.
For the doors with a narrow frame, the bracket of the joint is manufactured in a bent type to prevent accidents such as hand injuries and to secure space when the knob body is held. Recently thumb knobs for safe door are used a lot as they are safe and practical to use.
